

DUCOR PETROCHEMICALS OBTAINS ISCC PLUS CERTIFICATION

Rotterdam-based Ducor Petrochemicals has obtained the ISCC Plus certificate. Specifically, Ducor Petrochemicals meets all of the requirements for supplying polypropylene based on renewable resources, for its entire product portfolio, under the Mass Balance principle.

With the ISCC Plus certification Ducor Petrochemicals meets the highest sustainability standards, which guarantee the production and sale of renewable polypropylene products. By obtaining this certification, Ducor Petrochemicals and its parent company, Bazan Group, commit to meet the requirements of their customers and are taking the next step to achieve their sustainability goals.

With the ISCC Plus certification Ducor Petrochemicals meets the highest sustainability standards of International Sustainability and Carbon Certification (ISCC). ISCC Plus certification is a globally-recognized system for providing traceability of recycled and renewable-based materials across the supply chain.

CERTIFICATE AWARDED BY DEKRA

This ISCC Plus certification has been awarded by Dekra, acting as an independent party. To enable it to do so, the Dutch audit and certification agency tested Ducor Petrochemicals' systems and processes in the category for 'polymerisation company' against the certi-
